DESCRIPTION OF MEDICAL USE

Compounded Nipple Ointment with Mupirocin is a topical formulation used to treat nipple pain, irritation, and infections, often associated with breastfeeding. Mupirocin, an antibiotic, helps prevent and treat bacterial infections, promoting healing and comfort. This compounded ointment is typically customized to include additional ingredients like antifungals or anti-inflammatory agents based on individual patient needs.

Disclaimer: Illinois Compounding Pharmacy, Inc. is a 503A licensed compounding pharmacy that customizes medications to meet unique patient and prescriber needs. The FDA allows compounding when commercial drugs are in shortage or the patient is required to take a compounded drug because they will benefit from it. Compounding a product because it is cheaper than a commercial product is not allowed. Our pharmacy does not compound copies of commercially available products unless allowed by the FDA (ie FDA shortage list, allergies, palatability, etc.
